

## Ethereal Fichu

Picture yourself in this lovely sheer and flowing triangular shoulder wrap knitted in geometric lace motifs.

This is a good project to make in a special exotic fiber you've always wanted as it requires only a relatively small amount of laceweight yarn for a nice-sized versatile wrap.

Pictured model was knitted with 2 skeins Buffalo Gold "Buffboo"  
75% bamboo 25% pure bison (300 yards/50g skein)

Note: This updated Ethereal Fichu publication contains instructions for both the original style and a second style which is a slight variation (pictured on this page). This second style has a slightly wider profile for those who might prefer that. This publication has also been updated to contain an additional Chart D (which is used in the second style) as well as written stitch instructions corresponding to all charts.

Start at the point of the triangle and increase to the widest point, creating a pretty pointed edge along the sides of the triangle.

To add a bit of a curve to the basic triangle shape, the initial lace motif transitions into a similar one with a slightly different scale partway through the length of the fichu.

A pretty coordinating edging is worked sideways to bind off and complete your project.

Charted and written stitch instructions are included.

### Sizing

42" at longest point and  
56 (60)" at widest point

### Yarn, Needles and Notions

475 (500) yards laceweight yarn

Size 6 US (4.0 mm) knitting  
needles suggested

Gauge: 4 stitches per inch  
over blocked pattern stitch
